GYPSUM
POWDER

Gypure Plus is a superior-quality, lightweight gypsum plaster designed for interior walls and partition surfaces, including brick, block, and concrete. Suitable for both hand and machine application, it ensures easy handling and smooth execution.

Formulated with high-purity gypsum hemihydrate and specialized additives, it offers controlled setting and excellent workability. After drying, it provides a brilliant white, fine, and smooth finish. This asbestos-free premium plaster eliminates the need for an additional wall putty coat.

Key Features & Advantages

- Versatile material suitable for walls, ceilings, and ornamental designs.
- Fast setting time supports quicker execution and reduced downtime.
- Simple to mix and apply, minimizing effort and labor requirements.
- Produces a strong, smooth finish designed for long-term use.
- Resistant to moisture-related issues, helping reduce mold and mildew formation.

Applications

- Widely used for casting, molding, and artistic detailing.
- Perfect for false ceilings and decorative ceiling patterns.
- Creates smooth, refined interior wall surfaces.
- Effective for repairing cracks and restoring damaged plaster areas.
- Ideal for intricate architectural features and custom decorative elements.

DRYWALL
SCREW

Drywall Screws are essential for securing drywall sheets to wood or metal studs with ease and reliability. Made from high-quality mild steel, these metal screws feature Phillips Bugle heads and sharp tips and threads for smooth penetration and strong holding power. Their design ensures they create a secure thread within the material, providing superior stability. Ideal for construction and renovation projects, our Drywall Screws deliver top-notch performance and durability. For optimal results, choose the proper sized drill hole and screwdriver to match our premium Drywall Screws.

Features & Benefits

- Simplifies the process of fastening drywall to framing.
- Designed with a sharp point for easy penetration into drywall and studs.
- Coarse threads provide strong holding power, providing stability to drywall panels.
- Allows for flush installation, reducing surface damage and ensuring a smooth finish.
- Often coated to resist rust and corrosion, enhancing durability.
- Available in multiple sizes to suit different applications.

Application

- Primarily used for attaching drywall sheets to wooden or metal studs.
- Ideal for securing drywall to ceilings.
- Suitable for installing panels in suspended or drop ceilings.
- Used for fastening various types of paneling materials to studs.
- Used for patching and repairing damaged drywall sections.

Product Specifications

- Material: Mild Steel (C1022A)
- Screw Sizes: 6×13, 6×16, 6×19, 6×25, 6×32, 6×38, 6×50, 6×60, 6×75 & 8×100
- Packaging: 20 Boxes per Carton

DRYWALL FIBRE
JOINT TAPE

Introducing our premium Drywall Fibre Joint Tape, the ultimate solution for flawless and long-lasting drywall joints. Crafted from high-strength fiberglass mesh, this tape ensures superior crack resistance and seamless finish on your walls and ceilings. Say goodbye to unsightly cracks and imperfections – choose our durable, mold-resistant tape for a professional-grade finish. Achieve impeccable results with every application and elevate your drywall projects with the best in the industry!

Features & Benefits

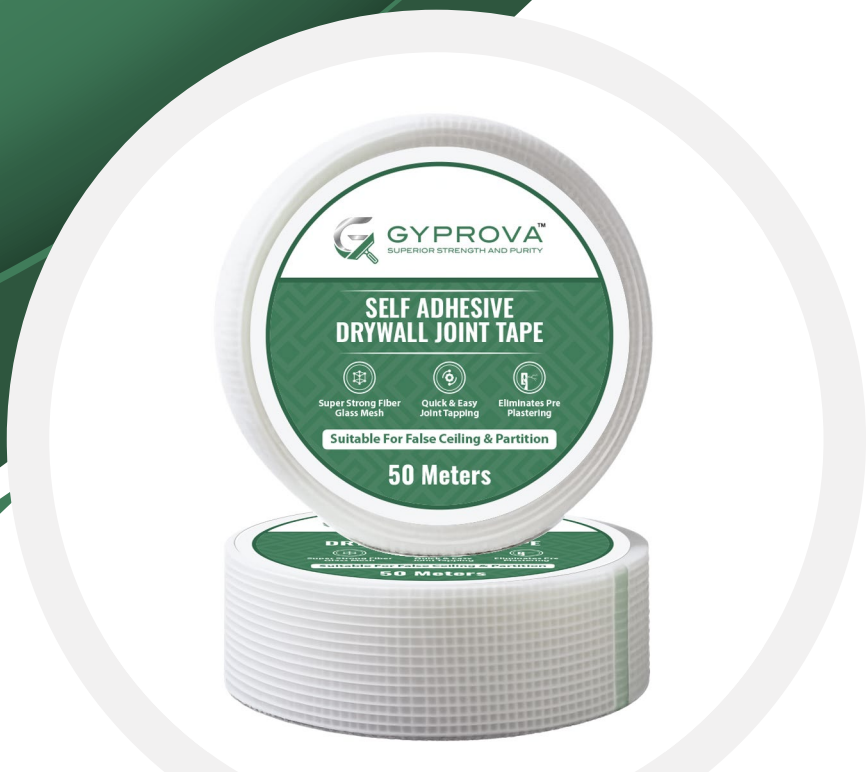
- Self-Adhesive
- Eliminated Pre-plastering
- Material – Fibreglass Meash
- Exceptional Strength & Durability

Application

- Strengthens and supports the seams between drywall panels to prevent cracking.
- Helps create a smooth, even surface for joint compound application.
- Used to reinforce and protect drywall corners from damage and wear.
- Ideal for repairing and reinforcing patches on drywall surfaces.
- Effective for reinforcing joints where drywall sheets meet on ceilings.

Available Sizes

- 50mm x 50mtrs
- 50mm x 70mtrs
- 50mm x 90mtrs



FASTENERS
